

Sumy National Agrarian University

Fu Yuanzhi

Fakulty of Agrotechnologies and Natural Resource Management

Department of Plant Growing-

Specialty: 201 «Agronomy».

Topic of the dissertation thesis: «Creation of Source Material for Controlled Cadmium Accumulation of Sunflowers»

Scientific supervisor: Candidate of Agricultural Sciences, Professor

Volodymyr Trotsenko

Term of studies: 2018-2022

Abstracts of the international conference:

1. Breeding of sunflower with low cadmium content.

The international scientific and Practical Conference, Honcharov's reading, Sumy, May 24-25, 2019

2. Efficiency of the method of indirect evaluation of sunflower breeding material for resistance to cadmium accumulation, Institute of Plant Varieties Expertise, Kyiv, June 2-4, 2019

Participation in conferences

Certificate

1. Parameters of the analyzing background for testing sunflower for resistance to cadmium uptake, Institute of Oilseeds, Zaporozhye. | <http://imk.zp.ua/index.php/konferentsii-seminary-dni-polia/264-14-2019>
